

Dear Patient,

At Hudec Dental we know that our patients have a lot of questions and concerns with respect to the COVID-19 virus/Coronavirus and we are reaching out today to share that we will continue to meet or exceed all expectations set out by the CDC (Centers for Disease Control and Prevention) and ADA (American Dental Association). We are closely monitoring the virus, as well as the flu virus, and what we can do to keep our patients and staff healthy.

Office Cleanliness - Hudec Dental has a stringent, well-established infection control protocol in place but we have significantly amplified those efforts and reinforced the importance of them to our staff.

In addition to our daily efforts, we have added some extra protocols to ensure the safety of our staff and patients by screening our patients before they come into our office and encouraging any staff members exhibiting any symptoms not to come to work.

Communication & Guidelines - We are keeping an eye on the updates, communications, and changes to protocol that the CDC and ADA release. Rest assured we have implemented all guidance and recommendations and will continue to do so as the situation progresses. As we receive updates, we will do our best to communicate those updates to you.

Training & Preparedness - We are working with the CDC and ADA to further prepare and train our staff members to handle potentially ill patients and taking appropriate action for the benefit and well-being of both our patients and staff.

Schedule with Confidence & Trust - You can schedule with confidence and trust knowing that Hudec Dental is going above and beyond in our effort to keep everyone healthy.

Our patients are our top priority and we constantly work to meet or exceed all expectations on a daily basis. We thank you for your support and understanding during a rapidly evolving situation as we make every effort to support our patients, associates, and the communities we serve.

Sincerely,

Dr. John A. Hudec
